

UI GreenMetric Questionnaire

University : Ubon Ratchathani Rajabhat University
 Country : Thailand
 Web Address : <https://www.ubru.ac.th/>

[2] Energy and Climate Change (EC)

[2.4] Renewable Energy Sources

<p>Buildings that use Solar Power (UBRU, Thailand)</p>	<p>The development of Biogas Fermentation that is suitable for household use (UBRU, Thailand)</p>
<p>Automatic slide doors (UBRU, Thailand)</p>	<p>Glass windows for natural light in the buildings (UBRU, Thailand)</p>

Descriptions:

UBRU uses 2 renewable energy sources

- 1) Solar Power: The installation of solar cells on the roofs provides solar power mainly for lighting and automatic doors in some UBRU buildings.
- 2) Clean Biogas: The biogas fermentation from food waste is developed by the Natural Resources and Environment Conservation Club, UBRU.
