[5.13] Ratio of Parking Area to Total Campus Area

Examples of *parking facilities on campus*

Description:

Nowadays, ARU has been limited the total spaces for parking of cars and motorcycles of 400 and 350 units, respectively. Many spaces being transformed into bicycle lanes, handicapped parking areas, bicycle parking areas and green-area. Therefore, the area for parking has slightly decreased, from 2.60 to 2.56 percent of the total area of the campus. We found that the parking area is adequate for vehicles on the working days of the university, except for the flea market on saturday and sunday. Additionally, in the future, the university still focused on the EV car parking to support on the policies of environmental-friendly transportation.

Total main campus area: 267,324 m²

Total parking area = 5,104.00 m²

(400 spaces*11.50 m² per space for car and 350 spaces*1.44 m² per space for motorcycle).

Ratio = 5,104/267,324 = 0.019
